

**Documentation of Land Use Plan Conformance and
NEPA Adequacy (DNA) #OR134-07-DNA-003
For Renewing Grazing Allotment # 3600641**

Note: The signed Conclusion at the end of this worksheet is part of an interim step in the BLMs internal analysis process and does not constitute an appealable decision.

**A. Spokane BLM District, Wenatchee Resource Area
Lease/Serial/Case File No. 3600641**

Proposed Action Title/Type: Grazing Lease Renewal/Custodial Allotment

Location of Proposed Action: This allotment is located approximately 23 miles east of the town of Goldendale, in Klickitat County Washington. The allotment is part of the Klickitat County Scattered Tracts Management Area (See attached map). Legal Description of the lands is as follows:

T4N R20E Sec 24: N½SW¼
 Sec 26: S½NW¼, W½SE¼

Description of the Proposed Action: The proposed action is to address a grazing lease renewal for grazing allotment # 3600641 for a period of 10 years (3/2007-3/2017). This allotment is a “Custodial” allotment with 240 acres of public land intermingled with private land owned or leased by the lessee. The proposed action will continue the authorized use of 30 AUMs on 240 acres. The allotment was renewed in 2007 under provisions in accordance with Sec. 325, Title III, H.R. 2691, Department of the Interior and Related Agencies Appropriations Act, 2004 (P.L. 108-108), which was enacted on November 10, 2003, this grazing permit or lease is renewed under Section 402 of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1752), Title III of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1010 et seq.), or, if applicable, section 510 of the California Desert Protection Act (16 U.S.C. 410aaa-50). In accordance with Public Law 108-108, the terms and conditions contained in the expired or transferred permit or lease have been incorporated into this permit or lease and shall continue in effect under the renewed permit or lease until such time as the Secretary of the Interior completes processing of this permit or lease in compliance with all applicable laws and regulations, at which time this permit or lease may be canceled, suspended, or modified, in whole or in part, to meet the requirements of such applicable laws and regulations.

The number of cattle and AUMS may be adjusted to an equivalent use, contingent on review and approval of the Field Manager.

Applicant (if any): James H. Miller

B. Conformance with the Land Use Plan (LUP) and Consistency with Related Subordinate Implementation Plans

☐ The proposed action is in conformance with the applicable LUPs because it is specifically

provided for in the following LUP decisions:

- Spokane District Resource Management Plan (RMP Record of Decision (ROD)/Rangeland Program Summary (May 1987)
- Spokane RMP Plan Amendment ROD (December 1992)
 - The proposed action is in conformance with the LUP, even though it is not specifically provided for, because it is clearly consistent with the following LUP decisions (objectives, terms, and conditions) and, if applicable, implementation plan decisions:

C. Identify the applicable NEPA documents and other related documents that cover the proposed action.

Spokane District Resource Management Plan (RMP)/Final EIS (August 1985)

Other documentation relevant to the Proposed Action:

- Washington Department of Fish and Wildlife Priority Habitats and Species - 1997 Databases
- Washington Natural Heritage - 1998 Database
- Washington Office of Archaeological and Historical Preservation - 2003 Database
- Spokane District 2003 Archaeological Survey Database and files.

D. NEPA Adequacy Criteria

1. Is the current proposed action substantially the same action (or is a part of that action) as previously analyzed?

Yes, this allotment is addressed in the Spokane ROD/RMP on page 50 authorizing horse grazing on 240 acres using 30 AUMs between the periods of 4/15 – 10/15. This complies with the principle of multiple use on a sustained yield basis in accordance with the Federal Land and Policy Management Act of 1976 (FLPMA). The Spokane RMP/FEIS, as adjusted or affirmed by the Spokane ROD/RPS, meets NEPA requirements for impact analysis. The environmental impacts of grazing for all alternatives are discussed in Chapter 4 (Environmental Consequences, pages 79-92) of the Spokane RMP/FEIS.

2. Is the range of alternatives analyzed in the existing NEPA documents appropriate with respect to the current proposed action, given current environmental concerns, interests, resource values, and circumstances?

The proposed action is within the range of alternatives identified and analyzed in the Spokane RMP/ Final EIS (1985), in the Summary (pages v-viii, and including Table S-2, which summarizes long-term environmental consequences and compares alternative allocations). The range of alternatives is thought to appropriately reflect current environmental concerns, interests, and resource values.

3. Is the existing analysis adequate and are the conclusions adequate in light of any new information or circumstances? Can you reasonably conclude that all new information and all new circumstances are insignificant with regard to analysis of the proposed action?

An interdisciplinary team conducted a review for any new information, studies, and analyses that would materially differ from earlier analysis in the RMP/FEIS.

Along with the provision in the LUP for monitoring of allotments and implementing changes to grazing use as mitigations to minimize impacts to other resource values, the existing analysis is still considered adequate. The new information is not significant regarding the proposed action.

4. Do the methodology and analytical approach used in the existing NEPA documents continue to be appropriate for the current proposed action?

The methodology and analyses used in the Spokane RMP/FEIS are still considered appropriate. In addition, all rangeland monitoring, studies, and survey methods used in the general area prior to and during the planning process continue to be accepted (or required) BLM methods and procedures.

5. Are the direct and indirect impacts of the current proposed action substantially unchanged from those identified in the existing NEPA documents? Does the existing NEPA document sufficiently analyze site-specific impacts related to the current proposed action?

The direct and indirect impacts from the proposed actions are substantially unchanged from those identified in the Spokane RMP/FEIS, which sufficiently analyzed the site-specific impacts related to the current proposed action.

6. Can you conclude without additional analysis or information that the cumulative impacts that would result from implementation of the current proposed action are substantially unchanged from those analyzed in the existing NEPA documents?

Cumulative impacts are identical to, and within the parameters of, those identified and accepted for Allotment 3600641 grazing use, since the proposed action was specifically analyzed in the Spokane RMP/FEIS.

7. Are the public involvement and interagency review associated with existing NEPA documents adequate for the current proposed action?

The Spokane RMP/FEIS and its ROD (including the Rangeland Program Summary) were distributed to all interested publics and other government agencies for review. Since the subject grazing leases are identified in the land use plan, which went through all of the appropriate and legally required public/agency review, at the time public involvement was considered adequate. The Bureau of Indian Affairs (BIA) was consulted, but individual tribes were not.

The BLM issued consultation letters regarding the grazing lease #0641 renewal on July 3, 2007. Letters regarding this allotment and a list of other leases expiring in 2007 were sent to the Washington State Department of Archaeology and Historic Preservation (DAHP), the Yakama Indian Nation, and the Colville Confederated Tribes. On July 9, 2007 the DAHP responded, concurring with the definition of the area of potential effect (APE). BLM did not receive a response from either the Yakama Indian Nation or from the Colville Confederated Tribes.

As of August of 2008, Cultural Resource Surveys were completed. Letters regarding these surveys were sent to the Washington State Department of Archaeology and Historic Preservation (DAHP), the Yakama Indian Nation, and the Colville Confederated Tribes on September 15, 2008. On September 18, 2007 the DAHP responded, concurring with the determination of effect. BLM did not receive a response from either the Yakama Indian Nation or from the Colville Confederated Tribes.

No other specific public involvement, or interested public status (under the grazing regulations at 43 CFR 4100.0-5), has been requested for these allotments, except from the grazing lessee who has been involved in all planning processes pertaining to this allotment.

E. Interdisciplinary Analysis: Team members conducting or participating in the preparation of this worksheet are identified on the cover sheet of this DNA.

CONCLUSION

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the existing NEPA documentation fully covers the proposed action and constitute BLM's compliance with the requirements of NEPA.

Note: If one or more of the criteria are not met, a conclusion of conformance and/or NEPA adequacy cannot be made and this box cannot be checked
